Churn Rate %

26.54%

Avg Tenure

32.37

Avg Monthly Charges

64.76

Count of customerID
by Churn

Contract

Select all	One year
Month-to-month	Two year

26.54% of customers have churned (1,869 of 7,043) — a high baseline rate that the rest of this dashboard breaks down by contract type, tenure, and services to find the specific drivers.

CHURN DRIVERS

Churn Rate %
by Contract

Churn Rate %
by InternetService

PaymentMethod	Churn Rate %	Total Customers
Credit card (automatic)	15.24%	1522
Bank transfer (automatic)	16.71%	1544
Mailed check	19.11%	1612
Electronic check	45.29%	2365
Total	26.54%	7043

Month-to-month contracts, fiber optic service, and electronic check payments are the three strongest churn drivers — each showing 2-3x higher churn than their alternatives. Electronic check stands out most sharply at 45.29% churn, suggesting a targeted push toward automatic payment methods could meaningfully cut churn.

COHORT AND TENURE ANALYSIS

Churn Rate %
by Tenure Cohort

Sum of Avg_Monthly_Charge
by Tenure Cohort

Churn is concentrated early — 0-6 month customers churn at 50%+, dropping steadily to under 10% by 48+ months. Notably, newer customers pay the least on average, so it isn't pricing driving early churn — points toward onboarding or contract type as the real cause

SERVICES AND ENGAGEMENT

Churn drops sharply as customers adopt more services — from 30-45% churn at 0-2 services to under 10% at 8+.

OnlineSecurity and TechSupport are the strongest individual levers, each cutting churn from ~42% to ~15% when present, making them prime candidates for proactive bundling rather than optional add-ons.

FINANCIAL IMPACT

Revenue Lost to Churn

2.86M

Revenue Lost %

17.83%

Total revenue lost to churn is 2.86M (17.83% of all revenue). Interestingly, while 0-6 month customers churn most often, they contribute least to revenue lost — the real financial damage comes from losing long-tenured (48+ mo) customers, who've accumulated the most spend. By contract, Month-to-month customers drive the vast majority of revenue lost (~1.9M), reinforcing Page 2's finding that contract type is the top lever for protecting revenue.
